WIBERG METAL

Industrial Flooring & Structural Solutions Since 2009 | Global Supply

About WIBERG

WIBERG is a professional manufacturer and global supplier of industrial grating and metal flooring solutions,engineered for safety,strength, and long-term performance.

Founded in 2009,WIBERG has been dedicated to the design,manufacturing,and supply of high-quality steel grating and related metal products.

With over 15 years of industry experience,we provide reliable solutions for industrial flooring,platforms,walkways,drainage systems,and structural applications across a wide range of **industries**.

Our products are widely used in oil & gas,power plants,infrastructure,marine engineering, manufacturing,and commercial construction projects worldwide.

Why Choose WIBERG

- Advanced manufacturing facilities with automated welding and galvanizing lines
- Strict quality control compliant with international standards (ASTM,ISO,DIN)
- Strong customization capability based on project drawings
- Stable global supply chain and fast delivery capability
- Export experience covering 80+countries

Our Values

- **Engineering Precision** – Designed for real industrial performance
- **Durability First** – Built to last in harsh environments
- **Safety Focused** – Anti-slip and load-bearing optimized
- **Customer-Oriented** – Fast response and flexible solutions

WIBERG is committed to delivering reliable industrial solutions that combine performance, safety,and cost-efficiency for global partners.

Manufacturing Capability

Our production base is equipped with modern **welding**,cutting,and surface treatment technologies, ensuring **consistent product quality** and high production efficiency.

From raw material selection to final inspection,every step is strictly **controlled to meet** global standards.

Our Product Range

We offer a complete range of **industrial grating** and flooring solutions designed for structural performance,safety,and durability across diverse applications.

01 Steel Grating

The core product for industrial flooring and structural support systems.

- Welded Grating
- Press-Locked Grating
- Carbon Steel/Stainless Steel
- Press-Locked Grating
- Serrated/Smooth Options

02 Stair Treads

Pre-fabricated grating steps designed for safety and easy installation.

- Anti-slip nosing options
- Bolt-on or Welded Types
- Custom Sizes Available

03 Trench Covers

Heavy-duty and light-duty solutions for drainage and cable management

- Pedestrian &Vehicle Rated
- Frame Options Available
- Anti-Fheft Locking Systems

04 FRP Grating

Corrosion-resistant,non-metallic alternatives for harsh environments.

- Molded FRP Grating
- Pultruded FRP Grating
- Pultruded FRP Grating
- Lightweight &Non-Conductive
- Chemical Resistant

05 Accessories

Complete fixing and fastening systems for secure installation.

- Grating Clips &Clamps
- Fasteners &Bolts
- Fasteners&Bolts
- Support Components

Our diversified product portfolio ensures optimal solutions for both standard and customized industrial applications.

Engineered for Every Application

From industrial platforms and walkways to drainage systems and safety structures,our products are designed to perform reliably under demanding conditions.

With flexible configurations and engineering support,we deliver solutions tailored to your project requirements.

Steel Grating

Engineered for Strength, Safety, and Versatility

Steel grating is the most widely used solution for **industrial flooring, platforms, and walkways**, offering high strength, durability, and excellent load-bearing performance.

Grating Types

Welded Steel Grating (W Series)

- High strength structure
- Cost-effective solution
- Suitable for most environments

Press-Locked Grating (P Series)

- Clean and modern appearance
- High lateral stability
 - Ideal for architectural applications

Technical Parameters

Bearing Bar Size: 20×3 mm-100×10 mm

Bearing Bar Spacing: 20/30/40 mm

Cross Bar Spacing: 50/100 mm

► **Materials:** ASTM A36, S235JR, S5304, S5316

Surface Treatment:

Hot-Dip Galvanized / Painted / Untreated

Structure Explanation

Steel grating is composed of load-bearing bars and cross bars, welded or press-locked to form a rigid and durable grid structure.

The bearing bars carry the load, while cross bars provide stability and spacing.

Applications

Stair Treads

Designed for Safety,Durability,and Easy Installation

Stair treads are prefabricated grating steps designed to provide safe and reliable access in industrial and commercial environments.

Key Features

- ▶ Anti-slip surface options for enhanced safety
- ▶ High load-bearing capacity
- ▶ Easy installation with pre-drilled end plates
- ▶ Durable and corrosion-resistant
- ▶ Suitable for indoor and outdoor applications

Welded Stair Treads

- ▶ Strong and economical
- Standard industrial use

Press-Locked Stair Treads

- ▶ Better appearance
- ▶ Suitable for architectural projects

Structure Components

- ▶ Bearing Bars
 - ▶ End Plates
- Cross Bars
- ▶ End Plates

Nosing Options

Checker Plate Nosing

Serrated Nosing

Abrasive Nosing

Installation Methods

- ▶ Bolt Fixing(Standard)

Welded Installation

Bolt Fixing

Welded Installation

Checker Plate Nosing

Trench Covers(Grating Covers)

Durable.Anti-Slip. Ideal for Drainage Solutions.

Trench covers are high-quality grating designed for covering drainage channels and trenches.They offer robust,anti-slip performance and effective drainage compared to traditional covers.

High Strength

Handles heavy loads and high traffic areas

Excellent Drainage

Allows efficient water flow while blocking debris

Anti-Slip Surface

Serrated or gritted surface for safe footing, even in wet conditions

Corrosion and Rust Resistant Hot-dip galvanized or made from corrosion-resistant materials			
	Drainage	Poor Water Drainage	
Variety of Sizes&Types Available as steel grating, press-locked, FRP, and more	High-Traction Surface	Slippery When Wet	
	Corrosion Resistant	Prone to Corrosion	
	Low Maintenance	Frequent Maintenance	

Used in drainage channels for roads, factories, parking areas, walkways, etc.

Trees &Landscaping

Factories

Parking Areas

Parking Areas

Walkways

FRP Grating

Lightweight. Corrosion Resistant. Maintenance-Free Solution.

FRP grating is a high-performance composite material designed for corrosive and demanding environments. It offers superior durability, safety, and long-term cost efficiency, compared to traditional steel grating.

- ✓ **Excellent corrosion resistance**
- ⚡ **Lightweight & high strength**
- ✓ **Anti-slip surface**
- ⚡ **Non-conductive & non-magnetic**
- ⚡ **Fire retardant options**
- ⚙️ **Long service life, minimal maintenance**

Ideal for highly corrosive environments where steel grating fails.

A long-term flooring solution for harsh industrial environments.

FRP vs Steel		Steel	
No Rust	VS	Rust Risk	
Lightweight	VS	Heavy	
Low Maintenance	VS	Regular Maintenance	
Non-Conductive	VS	Conductive	

Steel Grating Accessories Overview

An introduction to common accessories for steel grating

01.Installation&Fixing Accessories

► Grating Clamp(Most Common Accessory)

- **Material:** Q235 Carbon Steel(Galvanized),Stainless SO4/316
- **Common Types:**Type A(Top Mount),Type B(Side Mount),Type C(Saddle Mount)
- **Compatible Panel** Thickness:20mm,25mm,30mm,38mm,40mm,50mm
- Features:** No welding required,easy to remove,high corrosion resistance

U-Bolt/Saddle Clip

- **Use:** Secure gratings to support beams for light-duty applications
- **Specs:** Fits beam widths 40~100mm,Rod Diameter M8/M10

02.Edge Protection Accessories

Edging Plates

- **Material:** Q235 Galvanized Flat Steel
- **Common Specs:** 30×3,40×4,50×5mm(Width×Thickness)
- **Use:** Wrap the edges of steel gratings, enhance edge strength,prevent deformation

Anti-Slip Strips/Studs

- Use:** Improve friction of steel gratings,prevent slipping
- Common Specs:** Stud Diameter 8mm, Length 20~30mm,Anti-Slip Strip Width 20~30mm

03.Connection &Fastening Accessories

D Flat Bars/Connection Plates

- **Material:** Q235 Galvanized Flat Steel
- Common Specs:** 40×4,50×5mm

Bolt &Nut Sets

- **Common Specs:**M8,M10,M12(Galvanized or Stainless Steel)
- **Parts:** Flat washers,spring washers,lock nuts
